The Buddy Holly catalogue gets yet another cover. The Beach Boys' harmonies work perfectly and it makes for a loving version of Holly's most famous song.

With Gary Busey's performance in *The Buddy Holly Story* a success at the box office, Warner Brothers released this single as the final single from the group's time with that label. Both sides would appear on the Beach Boys' final Brother/Reprise LP, *MIU Album*, which the group was preparing for release.

"The Buddy Holly Story" can be justly credited with the current renewed interest in the pioneer works of the late great. This version does not have Holly's quivering freshness, but its steady beat, organ backing, guitar work, horns and vocals make it of interest to Top 40 programmers. Fun spin.
