

Argentine Single Releases

Identification and Price Guide

Yellow and Green "Odeon Pops" Label

The Odeon Pops label, intended for popular releases, was very popular in Argentina. Singles in the DTOA series continued at least through 1971. Beatles single releases that originally featured the Odeon Pops label encompass most of their career (through "Hey Jude"). In 1963, when the Beatles were introduced to Argentina, they were marketed on singles as "Los Grillos." While it's certainly the case that Argentine Odeon was attempting to translate the word "beetles," "grillos" actually translates better as "crickets"! Most later releases would leave "Beatles" untranslated.

Odeon Promotional 78

As Beatles became popular in Argentina in 1963, some 78 players were still available, but only selected singles would be issued as promotional 78's. Therefore, the only Beatles single that was released on the yellow-and-green 78 label in Argentina is "Twist and Shout." The term "promotional" refers to the fact that it was a special edition, sold at a lower price.

Black and Yellow "Odeon Pops" Label

The Odeon Pops label, intended for popular releases, was very popular in Argentina. Singles in the DTOA series continued at least through 1971. Beatles single releases that originally featured the Odeon Pops label encompass most of their career (through "Hey Jude"). Early promotional singles -- those in the 3000 series -- had red labels; later promotional singles had turquoise-colored labels.

Apple Label with Odeon at Left

As the rest of the world switched to the Apple label, Odeon of Argentina followed suit. All Beatles singles from 1969 through their breakup were released on Apple, and many solo singles were also released on Apple in Argentina. All early Apple singles featured a dark apple with "ODEON" at the left. Later reissues, usually with different catalog numbers, feature light green labels or white labels.

NOTE: The dark Apple label continued at least through 1971, after which time the DTOA series concluded.

Polydor Singles

As the Beatles were becoming the hottest act around, Polydor Records of Argentina issued the "My Bonnie" single on the orange scroll label.

A Word About Condition

The **condition** of a record is all-important as to determining its value. The values shown are drastically reduced for lesser condition copies, as shown below:

Near Mint, or NM, condition records are unscratched. If the label has stickers or tape, this must be noted. Essentially, they look like they just came from the store.

Very Good Plus, or VG+, condition records will have very few scratches. Without close inspection, they might pass for Near Mint copies. A VG+ record normally sells for half what a NM copy goes for.

Very Good, or VG, condition records have a fair amount of scratches, but they by no means appear "beat up". A VG condition record normally sells for one fourth of the NM price.

Very Good Minus, or VG-, condition records are starting to appear quite scratched. Still, when played, they play through, although the surface noise is becoming distracting. Many singles are commonly found in this condition. A VG- condition record normally sells for one sixth of the NM price.

Good, or G, condition records look scratched--basically all over, but they'll play through well enough to enjoy the song. A G condition record sells for one tenth of the NM price. [Some dealers also use a grade of G+, which sells for one eighth of the NM price.]

Fair, or fr, condition records are generally worthless unless the record is rare. They're scratched up and have distracting surface noise, but they're not completely ruined. No chips missing, and not cracked. They sell for one twentieth of the NM price or less.

Poor, or pr, condition records are basically ruined. They may be warped, cracked, chipped, or otherwise unsuitable for collecting. Most collectors only accept poor condition copies of something really rare until a better one comes along. They're virtually worthless.
