All of the members of the twelve-inch Vault Original series were held back and released at approximately the same time in November/December. These appear together in publications from late November, with reviews continuing into 1956. By the first of the year, though, the Vik label had replaced X. In 1957, after the Label X copies ran out, RCA Victor released LVA-1000, 1002, 1006, 1007, and 1009 into the main Vik series – giving them numbers 995 to 999.
