

Wild Life

Label ca1

Apple

SW-3386

Custom label.

Factories: Scranton, Los Angeles, Jacksonville, Winchester

First mentioned in trade magazines December 18, 1971.

This is the last known new solo Beatles LP to have been pressed by the Scranton plant. It was also Paul's first release without the standard Apple labels.

The McCartneys (Paul and Linda) have solicited the talents of the Denny (drummer, Seiwel and guitarist, Laine) to become the first supergroup of 1972. The LP is more acoustic and less gimmicky than McCartney's last 2 and among the 8 songs, 4 are triumphs: "Big Top," "Tomorrow," "Wild Life," and Mickey & Sylvia's "Love is Strange."

Stickers:

Most copies of the album came with a green and yellow title sticker on the front cover wrap (sticker S1). A few copies of that sticker have washed-out colors, and the background appears tan.

A few copies of the album sported one of two additional stickers, indicating that the album was by "Paul McCartney and friends" – for those who were unaware of who Wings was. Sticker S2 has all of the print the same size; sticker S3 has "and friends" in smaller print than "Paul McCartney."
